Gridvik.

INDEPENDENT RESEARCH · INDIA · PUBLIC DATA

India’s data-centre market, made clearer.

Source-linked research on projects, power and policy—so teams can distinguish what is operating, being built, announced, and still uncertain.

Free to read. Pay for timing, analysis and delivery.

WHO WE HELP

- **Equipment Suppliers & EPC**
- **Developers & Operators**
- **Investors & Funds**
- **Utilities & Policy Teams**

FREE TO EXPLORE

Public Registry, dated research references and change summaries.

PAID FOR

Scoped analysis, one-time packs and term-based data delivery.

Overview edition · November 2026 · Current site reviewed 2 November 2026

01. Separate the stages. Keep the context.

Project announcements may describe a multi-site programme, a campus, a single phase or a financing event. A headline megawatt figure alone does not tell you what is operating or when a site can connect. Gridvik records the stated stage, capacity basis and public evidence.

REGISTRY SNAPSHOT · RECONCILIATION SHOWN ON SITE: 26 OCTOBER 2026

242	130	133	14
Registry records	counted for capacity	logged sources	states covered

COUNTED CAPACITY BY DEVELOPMENT STAGE

OPERATING	UNDER CONSTRUCTION	ANNOUNCED / APPROVED / UNVERIFIED
778.69 MW	499.00 MW	2,236.00 MW
Gridvik counted	Gridvik counted	Gridvik counted

3,513.69 MW spans all three stages — not operating capacity.

This is Gridvik's counted total across operating, under-construction and announced/approved/unverified records.

How to read this snapshot. The Registry has 242 records, including facilities, programmes and finance/market milestones; 130 records are included in the capacity totals. These are Gridvik's public-source counts, not an official national total. Parent and child records are not silently added. MW may refer to IT load, a campus/site total or another stated basis; those measures are not interchangeable.

WHY STAGE SEPARATION MATTERS

Operating ≠ under construction ≠ announced. A programme headline may include multiple campuses or phases; a financing milestone is not new operating capacity. Follow the source and the record's capacity basis before comparing totals.

02. Who we help.

Different roles ask different questions. Gridvik starts from one public-source evidence base and shapes the view around the decision—without turning a signal into a promise.

Equipment Suppliers & EPC

THE QUESTION

Which projects may merit a closer look?

Use dated public project and phase signals by geography and equipment context to prioritize research. A procurement window is an estimate—not proof of an open RFP, confirmed buying intent, or award.

Developers & Operators

THE QUESTION

Which markets or sites need further diligence?

Review project stage, capacity basis, policy and reported power or approval evidence. Site availability, headroom and connection timelines must be confirmed directly.

Investors & Funds

THE QUESTION

What is live, underway or still an announcement?

Use stage-separated records and source-linked research to frame market and project questions. Gridvik does not give investment advice or confirm a project outcome.

Utilities & Policy Teams

THE QUESTION

Where is demand publicly reported?

Explore public project signals, policy and incentive context, and the free Power Readiness Index v0—a dated research reference, not an official utility rating.

Research is a starting point for further diligence. Confirm site, power, approvals and project status with the relevant parties.

03. Four ways to work with Gridvik.

The model is simple: free public access, with paid research and delivered data for teams that need a deeper cut, recurring review or tailored analysis.

FREE · PUBLIC

Free Project Registry

Browse the 242-record India Registry at no cost. Record pages show project stage, capacity basis, dates, source links and conflicts where available.

The free Monday digest summarizes verified additions and changes; it is not a weekly refresh of every record.

ANALYST-LED

Research & Data Services

Request a one-time State, National or Category Deep Dive, or a scoped Power & Approvals research pilot. Public evidence, assumptions and unknowns are labelled.

Scope, deliverable and timing are agreed in writing before work begins.

TERM PLANS

GridFeed

A delivered data file with monthly review, a dated change log and analyst-delivered alerts after a tracked project's phase change is verified, where included in the plan.

Not real-time monitoring. No same-day alert promise.

COMPARE CURRENT OFFERS

Pricing & Plans

Options include free access, one-time packs and Deep Dives, plus term-based GridFeed, Team and Vendor Pipeline plans. Custom research is scoped case by case.

See the live site for current prices, currency and exact scope. An enquiry is not a purchase.

Current delivery is analyst-led by file or email.

Hosted dashboard and API/MCP are in development—not hosted and not included in current plans.

04. A transparent research system.

Gridvik organizes public information—not private databases or claimed utility access. The record keeps the source, date, status and uncertainty visible.

A RECORD CAN SIT INSIDE A LARGER PROJECT HIERARCHY

PROGRAMME broad initiative → **CAMPUS / SITE** site or campus total → **PHASE / FACILITY** specific build or live unit

A phase may be included in a campus total; parent and child figures are not silently added twice.

1	**COLLECT**	Company statements, public filings, government/regulatory sources and established industry reporting.
2	**STRUCTURE**	Separate facility, programme, finance/market signal, parent and phase; state the capacity basis and dates.
3	**ASSESS**	Attach source links and a confidence score for source quality. Show conflicts; leave unsupported fields unknown.
4	**MAINTAIN**	The Registry follows a monthly maintenance cycle. The free Monday digest is a dated summary—not a weekly re-check of every record.
5	**DELIVER**	Power and approvals research, and paid phase alerts where included, are analyst-delivered by file/email after evidence is reviewed.

EVIDENCE BOUNDARIES

A confidence score describes **source quality**, not site certification or utility validation. A campus MW figure does not establish sanctioned load or headroom. Power-readiness and time-to-power fields are reported, estimated or unknown as the evidence allows—not utility schedules. Procurement windows are analysis, not proof of an open RFP or buyer intent.

No guarantee of power, land, approvals, energisation, transaction or investment outcome.

05. Start with the question you need to answer.

Choose a free starting point, a defined one-time cut, a term plan or a scoped research request. Current availability and prices are listed on the live site.

FREE

Browse the public research

Registry pages, Monday digest and the dated Power Readiness Index v0 reference.

ONE-TIME

Request a defined research cut

Vendor Pack or State, National or Category Deep Dive.

TERM PLAN

Follow selected records

GridFeed, Team or Vendor Pipeline, as scoped in a written plan.

SCOPED RESEARCH

Discuss a specific question

Power & Approvals pilot or site/land research, subject to public evidence and scope.

TALK TO GRIDVIK

hello@gridvik.com
gridvik.co@gmail.com

Browse the Registry · **Read methodology**

A request is an enquiry only; it does not start a payment or subscription. Scope, price, currency, taxes, delivery cadence and payment terms are confirmed in writing before work begins. Current paid delivery is analyst-led by file/email; a hosted dashboard/API is in development, not available today.

About Gridvik. Independent research based on public sources; not affiliated with a data-centre operator, investor or government body. Information is best-effort and may be superseded. Gridvik does not certify sites, confirm utility conditions, promise project outcomes or provide investment advice. Verify independently before making decisions.
